

Scale your business with cloud ERP

Mid-market businesses are choosing SAP S/4HANA Cloud Public Edition to scale efficiently, gain visibility and modernise operations.

The mid-market challenge

As a growing mid-market organisation, your business is evolving fast. You might be expanding into new markets, adding business units, or dealing with rising complexity across operations and finance. But if your systems aren't keeping up, growth becomes a burden, not a benefit.

Ambitious businesses need systems that scale with them

As your business scales, you face an increasing number of operational and financial challenges including:

- Siloed data and systems
- Manual reporting and duplication of effort
- Delays in decision-making
- Complex compliance and audit pressures
- Disconnected third-party tools

Legacy or entry-level platforms weren't built to support this kind of complexity. To move forward with confidence, you need a new kind of ERP, one that's cloud-based, integrated, and ready to grow with you.

The cloud ERP built for scale, speed and simplicity

SAP S/4HANA Cloud Public Edition is a future-ready enterprise solution designed for fast-growing, mid-sized businesses. Built on SAP's global best practices, it delivers a clean, cloud-native foundation that scales as you grow, without the burden of infrastructure or manual upgrades.

S/4HANA Cloud Public Edition highlights

Out-of-the-box functionality with built-in best practice and fit to standard processes for finance, supply chain, sales, manufacturing and more

Real-time insights with predictive analytics powered by the in-memory HANA database for faster, smarter decisions

Cloud-first IT strategy fully managed by SAP with no infrastructure maintenance required and lower total cost of ownership

Future-proofed and automation-ready with built-in Artificial Intelligence and Machine Learning for data-driven decision-making

Secure, compliant and global-ready, with support for 50+ countries and automatic updates for changing regulations and compliance requirements

Integrate seamlessly with other SAP solutions within the SAP Business Suite to enable connected processes, extensibility and custom app development

Whether you're modernising your operations or preparing for expansion, S/4HANA Cloud Public Edition gives you the speed and confidence to scale smarter.

Align planning, operations and finance for seamless scale

As your mid-market business scales, planning and financial complexity grows with it. SAP S/4HANA Cloud Public Edition gives you the tools to connect strategy to execution — unifying finance, sales, operations and supply chain on one intelligent platform.

Connect strategy to execution

Bring teams and data together with a unified approach to planning. Integrated Business Planning (IBP) breaks down siloes across departments, enabling real-time collaboration, agile decision-making and strategic alignment.

Model different scenarios to stay ahead of disruptions, better balance supply and demand and keep profitability on track.

- Sales & operations planning (S&OP)
- Real-time visibility
- Scenario modelling and forecasting

Smarter forecasting with AI

Go beyond spreadsheets and gut feel with built-in machine learning that drives smarter, more accurate forecasts. SAP S/4HANA Cloud Public Edition detects trends, seasonality and anomalies so you can optimise inventory, reduce waste and confidently meet customer demand.

From natural language search to automation across finance, forecasting, inventory and manufacturing, S/4HANA Cloud Public Edition brings Artificial Intelligence into everyday operations to boost agility and efficiency across your entire business.

- Real-time demand planning
- AI-powered forecast accuracy
- Data-driven inventory optimisation
- Natural language search
- Automated financial close processes
- Intelligent sales and order recommendations

Simplify financial complexity

As your business expands across entities, geographies or product lines, financial complexity grows with it. SAP S/4HANA Cloud Public Edition is purpose-built to manage this growth efficiently, giving you a single source of truth across finance and operations.

Automate consolidation, streamline compliance and gain real-time financial insights that support confident, data-driven decisions.

- Multi-entity and multi-currency support
- Real-time visibility across financial performance
- Automated compliance and reporting
- Faster close and simplified audits

By connecting financial data with every part of your business, S/4HANA Cloud Public Edition eliminates duplication, reduces manual effort, and ensures leadership has the clarity needed to guide growth with confidence.

This powerful cloud ERP system helps your mid-market organisation operate more efficiently, respond faster, and build a more resilient, connected business.

Take your mid-market business to the cloud with Leverage Technologies

SAP Gold Partner Leverage Technologies is the ideal choice for your transition to S/4HANA Cloud Public Edition.

When it's time to take your business to the cloud, you need to be sure the transition will be smooth and seamless, with minimal disruptions for you, your team and your business operations. You can rely on the experienced team at Leverage Technologies to guide you through the transition with planning, implementation, training and ongoing support.

With a proven track record, a structured approach and a focus on delivering tangible business benefits, Leverage Technologies stands out as a trusted partner for organisations seeking to modernise their ERP systems and drive growth through cloud-based solutions.

“When we were looking for a partner, we wanted a company that had very good support and a very good reputation in the industry, and Leverage Technologies are number one.”
